

The bee's nest by Julia

Last weekend I went in the forest with my friends Anna and Aurelia.

We were there to build a tree house. It was a bit cold, but okay.

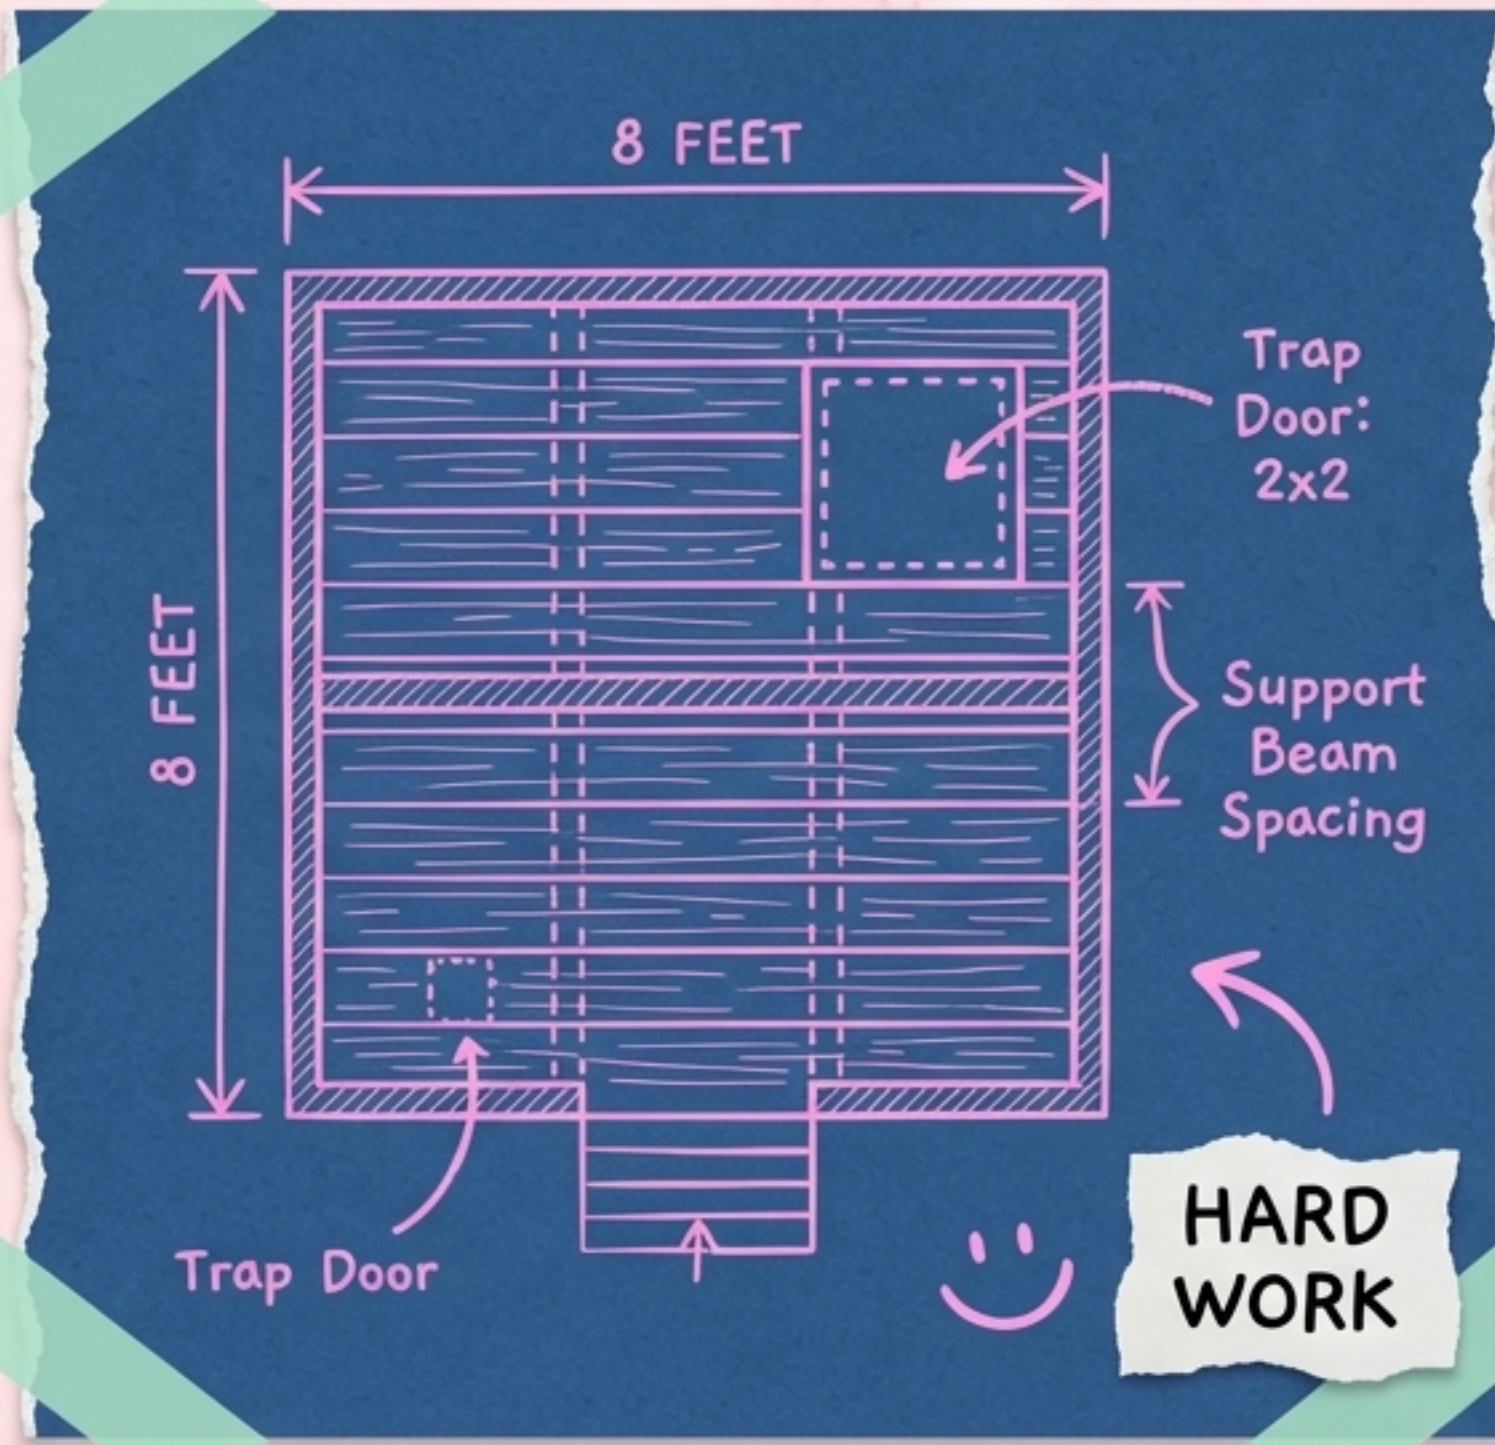

First we looked for the best tree house tree.
After looking and looking we found one that was perfect.

We worked hard and fast. After building the floor we took a rest near the lake to have a picnic.

When we came back we started to build the walls from the tree house.

I lifted a piece of wood and noticed there was a beehive underneath. The bees were very angry.

ANGRY
BEES!

WOODEN
PLANK

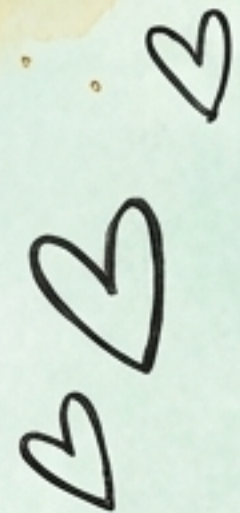

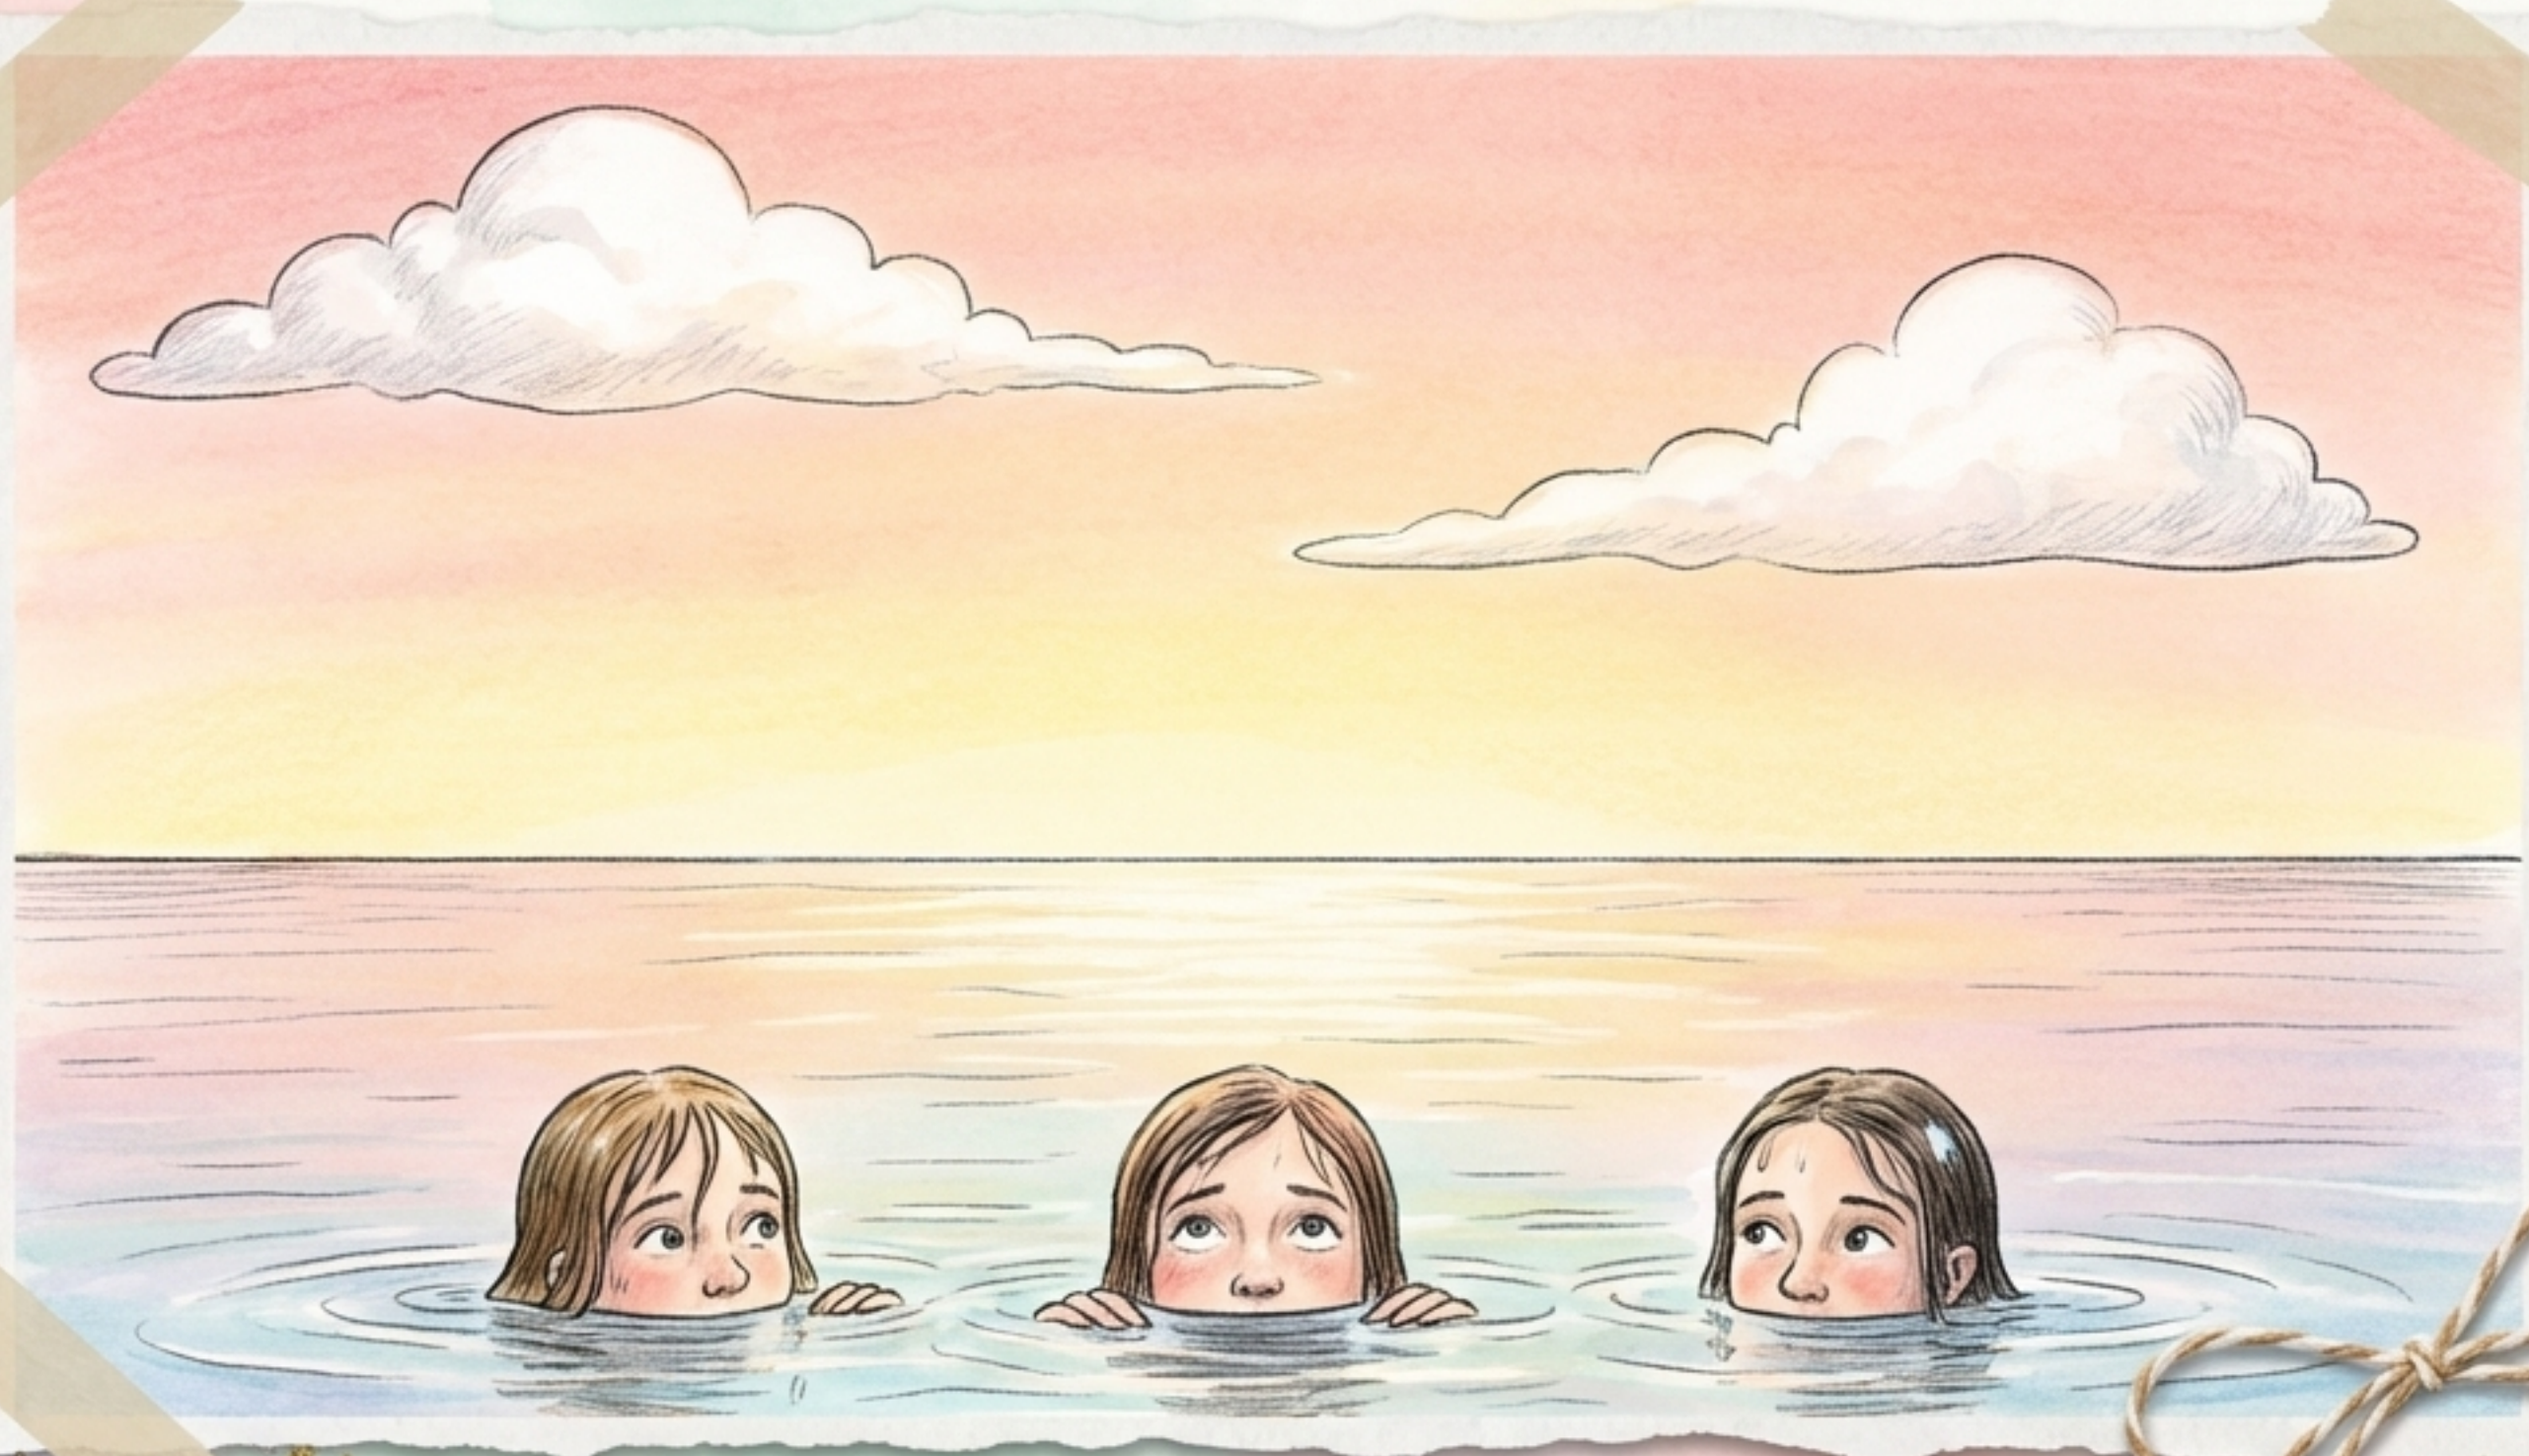

Anna screamed, "Run to the lake!"
We all ran to the lake.

In the Caveat: Aurelia screamed, "Jump into the lake!" We all jumped in and we stayed underwater for some time.

When we came out of the water the bees were no longer there.

We were so wet that we had to go home. It was very funny but also exciting. The next day we finished our project.
